DETAILED ACTION

1. Terminal Disclaimer received 06/27/2007 has been accepted and entered.

Examiner's Statement of Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Method, system, and apparatus claims of the instant Application (10 /759918) are a continuation of USPN 6,701,513 B1 which disclosed computer readable medium versions.

The prior art of record, US Patent 6,282,699 to Zhang et al. and US Patent 5,862,379 to Rubin et al., taken alone or in combination fails to teach such limitations in the independent claim 1 (and similarly in independent claims 11, 16, 17, 18, 19, 20, 21, and 22) as follows:

“choosing, by the user, to graphically or textually define an event handler procedure corresponding to an instantiation of a selected program object whose symbolic representation is displayed in the designer window;

if the user chooses to graphically define the event handler procedure, performing the steps:

graphically defining the event handler procedure for the instantiation of the selected program object displayed in the designer window;

incorporating the graphically defined event handler procedure into the application program; and

if the user chooses to textually define the event handler procedure, performing the steps:

textually defining, within a code window displayed on the computer screen, the event handler procedure for the instantiation of the selected program object displayed in the designer window, the code window being configured to accept textual inputs from the user; and

incorporating the textually defined event handler procedure into the application program.”

All independent claims, in some variation, provide for graphical inputs / graphically generating an event handler, plus textual inputs, to define or modify event handler procedures, and incorporating the graphical and textual event handler procedures into an application program.

Neither Zhang nor Rubin disclosed generating / creating an application program that includes graphically defining an event handler procedure and textually defining an event handler, whereby the visual programming system and the graphical designer system cooperate to

incorporate the instantiations of the program objects and the event handler procedures as recited in independent claims.

Thus all remaining dependent claims, claims 2-10 and 12-15, are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner's Amendment

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended to fill in the blank lines of the Specification, page 1. At page 1, before line 4, please insert the patent numbers into the paragraph.

This application is a continuation of U.S. patent application Serial No. 09/483,123 filed January 14, 2000, entitled A PROGRAM-DEVELOPMENT ENVIRONMENT FOR USE IN GENERATING APPLICATION PROGRAMS, now U.S. Patent No. 6,701,513. The entirety of said US Patent No. 6,701,513 is hereby incorporated by reference.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
